lymphocyte differentiation
tube morphogenesis
negative regulation of cell cycle
heart development
histone modification
regulation of DNA metabolic process
cell cycle arrest
peptidyl−lysine modification
response to hypoxia
response to decreased oxygen levels
intracellular steroid hormone receptor signaling pathway
androgen receptor signaling pathway
regulation of mitotic cell cycle
negative regulation of mitotic cell cycle
regulation of protein serine/threonine kinase activity
cell aging
regulation of cell cycle phase transition
regulation of cell cycle G1/S phase transition
negative regulation of cell cycle process
G1/S transition of mitotic cell cycle
cell cycle G1/S phase transition
response to oxygen levels
aging
histone methylation
protein alkylation
protein methylation
neuron death
regulation of neuron death
neuron apoptotic process
regulation of neuron apoptotic process
